

Ref: United Drug Warehouse HVAC system upgrade

Magna Drive,
Magna Business Park,
Citywest Road, Dublin 24.

To whom it concerns;

United Drug engaged the services of Riverside Mechanical to carry out extensive upgrade works to the existing HVAC system servicing all warehouse areas.

The majority of the installation took place in a live warehouse environment, which posed a number of challenges throughout the course of the project.

Riverside Mechanical proved themselves to be diligent, conscientious and understanding of United Drugs requirements at all times.

A concentrated effort was made on their part to enforce a strict construction schedule that achieved a zero loss to the business and minimal disruption to operations.

United Drug are grateful for the services provided by Riverside Mechanical and wish them every success in their future endeavours.

Sincerely,

United Drug Facilities Team.

United Drug
