

## Wexford General Hospital

Client: Health Service Executive  
Consultant: Douglas Carroll Consulting Engineers  
Main Contractor: JJ Rhatigan & Co

The new Emergency Department (ED) will provide a total of 17 treatment spaces and two resuscitation rooms for emergency patients; an increase of 13 treatment spaces on the four currently available and an increase of one Resuscitation Room.

This significant expansion in capacity will lead to improved admission times for patients and will also provide a much-enhanced environment for patients and for the staff working there.

A new Concourse at WGH, will encompass a new Reception/Admissions/Waiting Area and Coffee Shop for patients and relatives.

The new ED, which was delivered ahead of schedule, involved HVAC Mechanical Services and Life Safety Systems completed in 10 No. major treatment cubicles, 4No. Minor treatment cubicles, resuscitation room, isolation/gynaecology/paediatric multi-function rooms, minor ops room and other ancillary accommodation.
